

# Turf Sweep

**Fast and Effective Sports Field Sweepers**

## One-of-a-Kind Sports Field Sweeper

**Removes The Debris But Not The Infill**

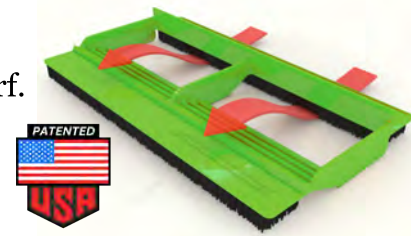

The **Turf Sweep** incorporates exclusive safety design elements no other sweeping system can provide. Quickly remove foreign debris from artificial turf and natural grass, to provide an immaculate playing surface and a safer environment for players. Removes stones, small sticks, metal spikes, screws, safety-pins, leaves, seed pods, and any other loose material, but returns the infill automatically. Suitable for all sports fields of all sizes.

Your key to a head-turning sports field is the innovative, non-invasive, yet thorough grooming action that only the unique and patented **Turf Sweep** can provide.

- Collects debris and lifts the pile providing a perfectly groomed finish
- Patented rubber crumb filter zones allow the crumb to be returned to the turf.
- No invasive metal parts, therefore preventing damage to seams.
- Allows more frequent grooming with no risk.
- Incorporates a one-of-a-kind patented **Debris Retention Intake Blade** that has been specifically tested to be the minimum required to ensure the most efficient and effective debris collection pass.
- 8 Ft Wide and 52 Inches long. Other sizes are available.
- Built tough using proprietary Aerothane™ abrasion & impact resistant blades.
- Virtually maintenance-free.
- Can be towed by any vehicle, and operates in silence behind an electric vehicle.

**Debris Retention Intake Blade**

The Turf Sweep contains patented **Debris Retention Intake Blades** that channel debris into four enclosed 12-inch mesh filter zones specially designed to return rubber crumb to the turf. Only the **Turf Sweep** provides **four rows of intake blades** - the equivalent of four standard sweepers operating one behind the other.

**Sweep Safer - Better - Faster**

# High Performance Is No Coincidence

The best sports fields make a solid first impression. It's important that you see professional results you expect.

Only the Turf Sweep can provide the following unique patented features, critical for cleaning large areas fast, and saving time and money.

## Elevator Steps

Positioned along the debris intake face of the blade helping to collect and retain debris earlier while towing at slower speeds.

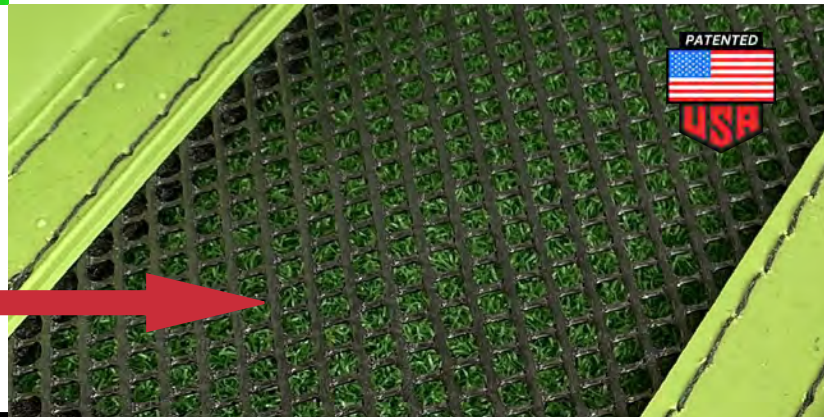

## Debris Retention Barrier

Keeps debris secure behind a raised edge, preventing it from falling back onto the field, especially when the tow vehicle slows or stops.

## Fine Sieve

Specifically designed to allow 3G crumb infill and water to filter back into your artificial turf, helping maintain an even spread and pristine playing surface.
